Professional Summary

With over **15 years of experience** in the technology sector, I work as a **Senior Software Engineer and Technical Lead**, transforming ideas into high-impact solutions. My expertise covers **Fullstack development with a focus on .NET (Core/Framework), C#, Angular, and software architecture**, building robust and scalable systems for Desktop, Web, and Mobile platforms.

I specialize in **legacy system modernization, microservices architecture, security, and complex integrations**, leading teams from architectural conception to the delivery of innovative products. I have a proven track record of optimizing performance and scalability, including the development of SDKs and the transition to microservices in internal architectures.

Passionate about complex technical challenges and **mentoring new talent**, I actively contribute to the growth of the developer community. I seek challenging opportunities where my skills can drive project innovation and success.

Professional Experience

Rerum Engenharia de Sistemas LTDA

Senior Full Stack Software Engineer | Technical Lead | Software Architect | C#.NET Core Angular - SQL Server

January 2016 – Present (8 years 7 months)

Varginha, Minas Gerais, Brazil

- **Security Implementation Lead at Elosgate (Start: June 2025 - Ongoing):**
 - Deployed as a senior consultant at Elosgate, responsible for the implementation and enhancement of the platform's internal security.

- Development of a robust application for data signing and approval within an **Azure** environment, incorporating **two-factor authentication** for stringent access control.
- Utilization of **JWT (JSON Web Tokens)** for data signing, ensuring the reliability and integrity of transacted information.
- Leading the integration of the client's existing applications with this new security solution, aiming for a unified and secure architecture.
- **Lead and Architecture Role in SobControle Financeiro Project (Start: January 2025 - Ongoing):**
 - Technical lead and software architect responsible for reactivating and modernizing a legacy financial system (inactive for 8 years) for Rerum itself.
 - Complete architectural redesign, migrating client-server communication from GWT and gRPC (.NET Framework) to a modern approach with **Angular 18** and **.NET Core / .NET Framework** APIs.
 - Development of a robust API gateway with **.NET Core** and **Yarp (Reverse Proxy)** and creation of a dedicated authentication API in **.NET Core 8**, enhancing security and modularity.
 - Data management with **PostgreSQL** and database version control via migrations.
 - Responsible for the maintenance and optimization of a **proprietary ORM** within Rerum, including improvements for connection pooling and efficient query generation.
 - Provided technical direction, made architectural decisions, and mentored the team, ensuring the project's evolution through all phases.
- **Senior Consultant at ONS (Operador Nacional do Sistema Elétrico) (2017-2024):**
 - Worked on various strategic projects, responsible for maintaining legacy systems, developing new features, and fixing bugs in a mission-critical environment.
 - Extensive experience with technologies such as **.NET Framework, WebForms, ASP.NET MVC, .NET Core, Entity Framework, SQL Server, and Informix**.
 - In the last 3 years of this allocation, I joined the team of a major new modernization project, utilizing **Angular** for the front-end and **.NET Core** for the back-end.
 - Implemented microservices architecture and asynchronous communication via **RabbitMQ queues**, applying agile methodologies (**Scrum**) for development cycle management.
 - Served as a technical reference and support for the team, assisting in resolving complex development and architectural problems, contributing to the performance and stability of solutions.
- Full Stack development in applications using **.NET (Core and Framework)**. Creation of APIs with **WCF and WebAPI**.
- Software architecture definition and technology selection.
- Development of user interfaces with **Angular and ASP.NET MVC**.

- Continuous support for multiple projects, ensuring high availability and application performance.

Instituto Dataminas

Senior Full Stack Software Engineer | C#.NET - IONIC

May 2020 – November 2021 (1 year 7 months)

Varginha, Minas Gerais, Brazil

- Complete development of a mobile application using **Ionic 3 for Android**.
- Development of a website using **ASP.NET MVC**.
- Architecture, development of main functionalities, and integration between mobile and web platforms.

LEMAF - Laboratório de Estudos e Projetos em Manejo Florestal

Full Stack Developer | C#.NET - ASP.NET MVC - Angular - PostgreSQL

July 2015 – December 2015 (6 months)

Lavras e Região, Brazil

- Development of a project for the ****Brazilian federal government's Bolsa-Verde Program****.
- Utilization of **Angular for the front-end and .NET Framework for the back-end**.
- Resulted in **70% cost savings in the social-environmental program's registration costs** and increased data reliability and transparency.

Rerum Engenharia de Sistemas

Full Stack Developer | Java - C# - JavaScript - SQLServer - Business Intelligence

March 2008 – July 2015 (7 years 5 months)

- Development on **.NET and Java** platforms.

Education

Universidade Presidente Antônio Carlos

Bachelor's Degree in Computer Science

2004-2007

Universidade Federal de Juiz de Fora

Master of Business Administration (MBA) in IT Project Management

2013-2014

Certifications

MS: Programming in C#

MCPS: Microsoft Certified Professional

Software Architecture Course (.NET)
